

What Happens When I Report a Moment?

Here's what happens next:

If you come across a moment on Currently that feels unsafe, inappropriate, or violates community guidelines, you can report it — and your report will be taken seriously.

Step 1: Your Report is Logged Instantly

When you tap ‘:’ > Report Moment and select a reason (e.g., nudity, hate speech, spam, etc.):

- The moment is immediately flagged in our system
- Your report is 100% confidential — the person you reported will not be notified

Step 2: Reviewed by Moderation Team

Our trained content moderation team reviews every reported moment, often within a few hours.

They check:

- The moment itself (image/video, caption, tags)
- The context and any previous violations by the user
- Whether the moment breaks any of our Community Guidelines

Step 3: Action is Taken (If Needed)

If the moment violates the rules, one or more of the following may happen:

Action	Reason
Content Removed	For harmful, explicit, or misleading content
Warning Issued	First-time or borderline violations

Account Restriction	Temporary limits on posting or visibility
Account Suspension	For repeated or severe violations

If the report is not valid, no action is taken — but the report is still recorded for reference.

Step 4: You May Be Notified (Sometimes)

- ☐ In most cases, you won't receive a direct follow-up
- ☐ For serious reports (e.g., hate speech or abuse), we may send a status update confirming that action was taken
- ☐ We never disclose details about the action or the user

What Reporting Does NOT Do:

- ☐ It won't block the person (you can do that separately)
- ☐ It won't delete the moment immediately (unless it's auto-flagged by our system)

Summary

Step	What Happens
You Report a Moment	It's instantly flagged — user is not notified
We Review It	Moderators check the moment for guideline violations
Action Is Taken	Content may be removed, user warned, or account restricted
You Stay Anonymous	Your identity and report remain private

You Help Keep Currently Safe Reporting is the fastest way to help us keep the platform real, respectful, and safe for all users.
