

Can I Hide from the Map?

Here's how:

Yes, you can! On Currently, your visibility on the Map is entirely in your control. If you don't want to appear on the Map — whether always or for a specific moment — you can easily hide.

When You WON'T Appear on the Map

Your moment will not show up on the Map if:

Condition	Result
You skip Check-In	Not visible on the Map
Your moment is Followers Only	Not shown publicly
Your profile is Private	Hidden from Map entirely
You disable location access	Moment can't be mapped

How to Stay Off the Map (Always or Moment-by-Moment)

Option 1: Don't Add a Location (Check-In)

- When posting a moment, simply leave the Check-In section blank
- Your moment will appear on your profile and to followers, but not on the Map

Option 2: Change Privacy to Followers Only

- Tap the Privacy setting while posting your moment
- Select Followers Only
- This hides the moment from Map and Discover — only your followers can see it

Option 3: Make Your Profile Private

- Go to Settings → Privacy → Toggle Private Account ON
- Your moments, even with Check-Ins, will never appear on the Map or Discover

Option 4: Disable Location Access on Your Device

- On iOS: Settings → Currently → Location → Select “Never” or “Ask Next Time”
- On Android: Settings → Apps → Currently → Permissions → Turn off Location

What If I Already Posted a Mapped Moment?

Currently does not yet support editing moment privacy or location after posting, so to remove yourself from the Map:

- You’ll need to delete the moment from your profile
- Then repost it without Check-In or with different privacy settings

Your Map, Your Choice

We designed the Map to enhance real-world discovery — not compromise your privacy. You’re always in charge of:

- Whether to appear on the Map
- Who can see your location
- What you choose to share, and when

Summary

Want to Stay Off the Map?	Do This
Skip Check-In	Don’t tag a place while posting
Use Followers Only Privacy	Hide moment from Map & Discover
Set Profile to Private	Hide all your content from Map and public feeds
Disable Location Permission	Prevent your device from sharing location info entirely
