

How Are Places Categorized on the Currently Map? Here’s a polished article explaining: On the Currently Map, you don’t just see people — you also see Places where real Moments are happening. These places are smartly categorized to help you explore what’s going on around you, fast.

Types of Place Categories

Places on the map are grouped into categories like:

Category	Examples
Food & Cafes	Restaurants, coffee shops, food trucks
Shopping	Malls, stores, local markets
Fitness & Sports	Gyms, yoga studios, sports clubs
Entertainment	Theaters, arcades, event venues
Outdoor Spaces	Parks, beaches, lakes
Education	Colleges, libraries, coaching centers
Workspaces	Offices, co-working spaces
Services	Salons, repair shops, wellness centers
Travel & Stay	Hotels, homestays, hostels
Other	Unique or uncategorized local spots

How It Works

- When someone posts a Moment with a place tagged, it’s pinned on the Map.

- If that location matches a known type (e.g. cafe, gym), it's grouped into a place category.
- You can tap a category or filter to explore Moments happening at places you care about.

### Filter by Place Type

Use category filters (coming soon) to explore specific spots:

- Want to see only cafes? Tap
- Looking for a vibe at the gym? Tap

This helps you discover trending places and hotspots nearby — based on real user activity.

### Why Are Places Important?

- Places collect Moments posted by visitors
- The more Moments a place gets, the more popular it becomes
- Places with more check-ins may get verified, featured, or ranked

*Your Moment also boosts a place's visibility — post at your favorite hangout and let others discover it!*
