

## How Do I Search for People, Places, or Trends?

The Search feature on Currently is your shortcut to discovering everything — from friends and creators to hot spots and trending vibes.

Whether you're looking for a specific person, checking what's buzzing near you, or curious about a new café people are tagging — the search bar is your gateway to *what's happening right now*.

### Where to Find the Search Feature

- ☐ Open the Currently app
- ☐ Tap the magnifying glass icon in the bottom navigation bar

This opens the Search & Explore screen.

### What Can You Search For?

You can search for three main things:

#### 1. People (Users & Creators)

Type a name, username, or handle to find people on Currently.

You can:

- ☐ View their profile and latest moments
- ☐ Subscribe to their updates
- ☐ See who they follow and who follows them

Looking for friends, influencers, or creators? Just start typing their name.

#### 2. Places (Check-Ins & Hot Spots)

Search for any location to find:

- ☐ Moments shared from that place
- ☐ Popular places near you

□ Who's been there recently and what they were doing

Example: Search "Starbucks" to see live or recent moments from various Starbucks locations nearby.

### 3. Trends (Activities, Moods, & Hashtags)

Want to know what everyone's up to?

Search trending:

□ Activities (e.g., "Working Out", "Partying", "Eating Out")

□ Moods or captions (e.g., "Chill Vibes", "Midnight Feels")

□ Hashtags (e.g., #NowPlaying, #WorkMode, #WeekendVibes)

Trends show you what's catching attention on the platform — in real time.

### Live Suggestions as You Type

As you start typing in the search bar, you'll get smart suggestions for:

- Top profiles
- Active locations
- Popular activities
- Emerging hashtags

You don't need to spell everything perfectly — the system's got your back.

### Bonus: Tap-and-Go from a Moment

Spotted something in a moment you like?

- Tap the activity, place, or tagged person
- Instantly explore more moments with the same activity, from that location, or by that user
