

How Do I Check In at a Location?

Want to show where you are in the moment — whether you're at a café, gym, concert, or mall?

Currently's Check-In feature lets you tag your location so others can discover where you're hanging out *right now*.

It's quick, simple, and powerful for discovery.

Step-by-Step: How to Check In at a Location

1. Open the Currently app
2. Tap the '+' button (center bottom) to post a moment
3. Select your Activity (e.g., Working, Eating Out, Playing Football)
4. Tap on the "Check-In" field
5. You'll see a list of nearby places based on your location
6. Choose one from the list or search manually
7. Complete your moment with optional photo/video, caption, tags, or timer
8. Tap Post

That's it — you've successfully checked in!

What Happens When You Check In?

- Your moment gets linked to the place
- It appears on the Map (if public)
- It adds a footfall to that location's profile — forever
- Other users visiting that place can see your moment as part of its social presence

Each check-in is a social stamp — real, permanent, and discoverable.

You're Always in Control

- ☐ You don't have to check in if you prefer not to
- ☐ You can choose "Followers Only" privacy to limit visibility
- ☐ Your exact location is never shared — only the place you tag

Summary

Action	Result
Check-In Selected	Tags your location in your moment
Visible on Map	If moment is public and check-in is enabled
Boosts Discovery	Others can find that place via your moment
Recorded Footfall	Your check-in stays forever on the place's profile

Ready to turn your real-time experience into a footprint others can follow? Start checking in, and let your moments inspire more discovery around you.
