How Do I Delete a Moment? No worries — you can delete any of your own Moments at any time! Shared something by mistake or changed your mind?

Steps to Delete a Moment

1. Open the Currently app

2. Go to your Profile

3. Scroll to find the Moment you want to delete

4. Tap on the Moment to open it

5. Tap the three-dot menu (⋮) or options icon on the post

6. Select "Delete"

7. Confirm when asked: *"Are you sure you want to delete this Moment?"*

 Your Moment will be permanently removed from your profile and feeds.

Important Notes

• Only you can delete your own Moments • Deleted Moments cannot be recovered • All likes, views, and comments tied to that Moment will also be removed

---

 Tip: Want to change something instead of deleting?
You can always post a new updated Moment — Currently is about being in the moment, not being perfect.

Would you like this turned into a quick 3-step animation or in-app tool tip for new users? I can help design that too!
